Go and see Ed. and Judd at the Exchange Hotel Barber shop. 22-11

Hanging lamps, side lamps, bar fixtures at A. O. ROBBINS's.

I. Stern's telephone line to the new town works like a charm, considerable business was transacted over the line yesterday.

A short tour among the concert halls dance halls and other places of amusement showed them all abundantly patronized last night, such little games as keno, faro, monte and high ball were going on to the strains of enlivening music and the clink of the glasses as the lucky ones drank and the less fortunate ones washed down their disappointment. No one need lack for amusement.

Dr. J. M. Cunningham left the City on last night's train for Chicago where he will purchase furniture for the big hotel at the Hot Springs. He will furnish the hotel in first class style in every respect making it the best house west of St. Louis. Cunningham & Co. have the means and they have the will to make the hotel all that the leading house at a great popular resort should be.

The following named ladies were in attendance at the ball which took place at the Grand View Hotel night before last: Mrs. Scott, Moore, Miss Williams, Mrs. Bennett, Miss Menet, Miss Horner, Miss Lewenstein, Mrs. Shupp, Panduras, Mrs. Simms, Miss Hastings, Mrs. Jones, Mrs. Dr. Sutin, Mrs. Leon, Mrs. Spears, Mrs. Towner, Mrs. Ober, Miss Norval, Mrs. Jennings.

The evening was quite chilly and ice cream and lemonade was not much in demand, the dancers preferring the warmer drinks such as tea and coffee, everything passed off quietly and pleasantly.

ENTERTAINMENT.

Hon. Pedro Valdes of Sapojo was in town yesterday.

Richard Dunn left in last night's train for the east to purchase goods for the mercantile house of Grzechowski & Dunn, at Puerto de Leon.

Bill Arlington the well known humorist who is traveling through the west is expected in Vegas on about the 26th, when he will give an entertainment to the people of this city.

A Colorado editor is credited with charging a show ticket for an ad, and he did not care how much or how little space was taken. Richard to have that much money and he proposed to make the circus pay it.

THE SANTA FE AND RIO GRANDE.

The statement is made upon the authority of a Santa Fe man that the Atchison Topeka & Santa Fe has now obtained a controlling interest in both the stock and bonds of the Denver and Rio Grande, and that at the next election this road will again pass under the control of the Santa Fe, and the cars will be asked to remove the receiver.

STATE OF NEW MEXICO.

Bloomington, Ill. Last Sunday night thieves entered Funk's pasture at Shirley on the Chicago and St. Louis railroad, six miles south and stole thirty seven head of fine cattle, driving them to the Norman stock yard, eight miles north on the same road, after which they shipped them to Chicago.

On the 4th inst. a herd of about thirty horses and mules, belonging to Capt. Hooker's command, stationed at Ojo Caliente, in southern New Mexico, was jumped by Indians. The herd gained some seven or eight soldiers of the Ninth cavalry were all killed and the animals driven off. The Indians are reported 40 strong, including the notorious chief Victoria and others from Mescalero agency. Troops from Fort Bayard are all out after the Indians.

The Wisconsin Democrats have put up for governor Alexander Mitchell, the eminent banker, of Milwaukee, who is also president of the Milwaukee and St. Paul Railroad, next to the most powerful corporation in the Northwest. Mr. Mitchell is a Scotchman and is now visiting in Scotland. He telegraphed some days since his unwillingness to be a candidate. But he, like that, has a bark of money, and such a man is needed to lead pure, honest and patriotic parties in these Lacyen days.

Bridge Contract Let.

The county commissioners have advanced. They let the contract to build the bridge over the Gallinas river to E. C. Lovell. It is designed to cost in bonds and cash about \$3,800. It will be completed in 60 days from the date the contract is made.

M. H. Bailey who is engaged in mining on Pueblo creek twenty miles from Taos has presented the GAZETTE office with specimens of ore from the mines. The names are called the Piccarillo mines and eight or ten companies are engaged in prospecting. A car of ore came here for shipment the first of the month and this second load last week. Mr. Bailey came with a two horse team, bringing 700 pounds and reports that he could haul 1,000 pounds over the road he which was up Pueblo creek to the Las Vegas and Taos road. He reports that Taos road from this city could be put in good order at a reasonable figure and adds that the miners would come here to ship their ore and purchase their supplies and equipments.

The specimens furnished contain oxide of copper, brown oxide, red oxide, brittle silver etc. Some of the specimens will assay \$200 to the ton, and the mines, are increasing in richness, as they go down. The veins average eighteen inches at a depth of twenty five feet. The Missouri, one of the leads assayed \$100 where it dropped out. The mines promise to be of extraordinary richness and a regular Leadville excitement is not impossible. If the road from this city is improved, this will be the great point for outfitting, but if the road is not put in good order then Garland on the D. & R. G. road which is at about the same distance. There is no town nearer than Taos which is about 20 miles north east, the region between Pueblo Creek and the Rio Grande had been repeatedly prospected but the formation is quartzite requiring blasting, most of the prospectors have abandoned the ground. The best known prospectors are Browne of Jerome, Burchard, Steele, Sterling and Scott and others. The companies will not put up mills for the present but will depend on shipping for sale.

The importance to Las Vegas of securing the trade of, and travel to, these mines can scarcely be over estimated.

An occurrence which was very exciting and for a time threatened to have added a tragic element was witnessed on the street in front of the GAZETTE office last evening. One of the hacks which runs between the towns stopped at a grocery a short distance down the street and the driver went into and brought out some parcels. Just as the last article was brought out the mules attached to the wagon started to run away. A number of men saw them coming and endeavored to stop them but only succeeded in turning them, and they made a circle on the narrow bridge over the arroyo and started back. As they came down the street the first time a little boy was discovered in the wagon holding tight to the lines but the wagon came near turning over at the bridge and he had to drop the lines and cling to the side. As the team started back, the driver caught the off mule by the bit and hung on but the other mule dragged the whole outfit without greatly slackening his speed. A party of men formed across the street at the Hayes building and the team again turned and came down the street. This time the little boy was still yelling for some one to take him out. By this time the street was full of men, all making frantic efforts to check the gray mule on the near side which still persisted in running. The team was turned up to the right hand side of the street and the wheel caught on a tree at the door of the GAZETTE composing room, the team broke away from the wagon the boy shot out of the wagon to the ground but was picked up uninjured and the interest in the runaway rapidly subsided.

The wagon had the pole broken and the front stove in. No one appeared to know or care what became of the team which was last seen flying across the plaza.

One of the concert halls boasts the presence in its orchestra of a woman who sings excellently well and avokes the most mellifluous and soul soothing strains from the strings at a guitar.

EATING DEPARTMENT.

Has had Great Experience in the Business, having been connected with the Sherman and Tremont Houses, Chicago, and the Railroad Eating House at Luckin, Kansas.

A HACK FOR PASSENGERS.

Runs for this House to and from the Depot.

LOTS FOR SALE AT

THE HOT SPRINGS

OF NEW MEXICO.

The completion of the Atchison Topeka & Santa Fe Railroad to Las Vegas and the Hot Springs and the fact that they, the greatest corporation of its age, have recently begun the works of these Springs, their policy being to spend no money to market grain, attract cattle, and to furnish ample food and bath accommodations to meet the demands of these visitors. By their grand system of advertising, and the liberal spirit that they always show toward the traveling public, makes it an accomplished fact that the Hot Springs of New Mexico is destined to be the greatest Sanatorium and Tonics resort in America.

The grounds at the Springs has been laid out in lots and roads to suit the wants of the home, pleasure, and health seekers, the capitalist, and all who want a desirable place to live where health and good society can be obtained. These lots both for business and residence are now offered for sale at a very reasonable price. These

Remarkable Springs

although until within a few years comparatively unknown to the outside world, have a local reputation which antedates the present century, and from time immemorial have been resorted to as the "Great Sierras" by the natives of this Territory. The mineral constituents of these waters closely resemble those of the Hot Springs of Arkansas, and the famous Thermal Springs of France. The Pfeifers in the valley of the Ichibé, and the Plombeires, the popular resort of France, lie in the valley of the Vosges Mountains, and the Leas in the picture are valley at the foot of the pass over the Gemini Mountains. At these springs thousands of invalids visit annually, and are

Cured of the Diseases of the Blood

Skin, stomach, paralysis, gout, rheumatism, gravel, catarrh, and female complaints by bath in and drinking the water. People visiting the Hot Springs of New Mexico have recovered of all of the above diseases, and even more. It is the great panacea of the world for lung diseases. The atmosphere is clear and dry, and pulmonary and respiratory complaints are scarcely known.

The proportion of deaths from consumption here being smaller than in any state or territory in the Union. The mean annual temperature at these Hot Springs is 50° Fahr, being at an elevation of nearly 4,000 feet. Summers are cool; nights from 55° to 60°, and the winters are remarkably mild and dry, the temperature seldom falling below the freezing point. The rainy season is in July and August. These Springs are located in about 35 degrees of north latitude, which makes the climate mild and temperature unbroken by extremes either of heat or cold. The bracing air, its mountainous, the gorgeous picturesqueness of its canyons and valleys combine to make it one of the most pleasant resorts for tourists. Only 36 hours ride from St. Louis. After leaving La Junta, Colorado, until reaching the Springs the traveler sees spread before him a vast panorama of mountain, valley, and rocky canyons, stretching hundreds of miles. No better place can be found for the stock-grower to live and raise his family than at the springs.

With all of the above advantages the duelist of comprehension cannot fail to see the advantage of an early investment in property in and about the Springs, as there are but a few hundred lots for sale, and they will soon largely enhance in value from the prices now asked.

A Word to the wise is Sufficient.

Write or call at our office in the Baca building in Las Vegas, or at the Springs.

MILLS BEECHER & CO.

GIST'S NEW
